

4.4 Personalise and connect learning: Communicate learning in multiple modes

Essence >

The teacher ensures that the curriculum incorporates rich and varied modes of making and communicating meaning.

Key actions: Teachers

- Monitor my planning and design of activities to ensure a balance of communication modes
- Ensure students consider how to present their learning using the mode that best suits the purpose and audience
- Structure learning tasks where students must use varied modes for accessing, processing and presenting information
- Develop in my students the skills to critique what they see, hear and feel through various modes of communication, and model strategies of how to do this
- Reinforce a culture of risk taking where we all explore new media and modes of communicating learning
- Teach safety considerations in each mode, such as safe use of art tools, warm up and cool down requirements in dance or drama, and safety online
- Model being open to many modes of accessing, processing and presenting information (eg Twitter, Wikis, written and oral text)
- Teach the conventions and specialist terms for each mode (eg how to create a storyboard for a video production, how to use different camera shots, the position of the camera and panning to tell a story and communicate different moods through film)
- Design activities where students learn in two different modes and make comparisons (eg character development in a book and in a film)
- Ensure students show what they've learnt in different modes over time
- Teach students to challenge different communication modes by asking questions that encourage critical responses
- Recognise that all students are expert in something, which may be demonstrated in ways not usually recognised in school, and dedicate time to sharing this expertise

Key actions: Students

- Use research from many sources and show the same information in different ways
- Talk with others to understand the main ideas and to decide on a form of presentation
- Suggest ways to use media that I'm skilled in, and offer to help other people
- Try new technologies and ask others for help
- Practise communicating better by varying my voice, body language and using the space well
- Challenge myself to present my learning in a new way, to suit the purpose and get the best audience response

There are many ways to see and interpret the world ... The limits of our language do not define the limits of our cognition.

Elliot Eisner

Justice alert

Whose ways of communicating are being privileged in the culture of the classroom?

Ways to communicate learning in multiple modes

A kaleidoscope is the metaphor: Think of the pieces of glass in a kaleidoscope as modes of learning. Each mode helps students to see meaning from a different perspective. Just as a kaleidoscope lens makes a pattern from the glass pieces, so students make connections between learning modes to create their own meaning. When the kaleidoscope is turned, different patterns emerge. Students' life experiences give different 'patterns' to learning. Knowledge and understandings are ever-changing through our own unique lenses.

Create a flexible learning environment:

- **Organise the space** and the curriculum so that students can be involved in multiple tasks.
- **Engage all the senses** so that students work with sound, movement, pictures, practical activities, and both verbal and non-verbal role play.
- **Develop a shared inventory of ideas** for communicating learning in influential ways, such as traditional modes, new technologies and skills drawn from all curriculum areas.
- **Use 'spotlight' sessions** in which students share their favourite mode of communication (eg playing an instrument, drawing, computer animation, mime, lecture or demonstration).

Teach specific strategies:

Treat each mode of learning as a 'language' and teach specific decoding and critiquing strategies. For example, teach students how to organise electronic folders; 'mash' information from several websites; create mood through colour, sound or camera shots; or make different types of puppets. Directly teach students skills such as how to organise electronic folders, safely use glue guns and electrical equipment, write scripts, and add voice-overs to PowerPoints.
